

ARE MANUAL PROCESSES MANAGING YOUR FLEET?

Optimize Operations with Automated Fleet Management Solutions

The right Transportation Management System (TMS) can help you improve fleet performance, reduce expenditures and achieve higher levels of customer satisfaction and loyalty.

Our solutions are powered by Descartes, a global leader in on-demand, software-as-a-service solutions for logistics-intensive businesses. Together, we help users reduce or eliminate manual processes by automating and synchronizing functions such as:

- Driver Vehicle Inspection Reports
- Driver eLogs
- Route Planning/Execution
- Navigation
- Telematics and Compliance
- Fleet Visibility
- Signature Capture
- Proof of Delivery
- Direct Store Delivery
- Cross Docking
- Customer Notifications
- Yard Management
- Asset Tracking

Managed Service Offerings (MSO) – An Extension of your Team

Need hands-on support with your equipment so your IT department can focus on other priorities in the business? **BARCOM** can help. We manage your fleet's driver devices and provide turnkey services to minimize labor-intensive and time-consuming tasks placed on internal resources.

SET-UP AND DEPLOYMENT SERVICES:

- Staging
- Product Set-Up and Configuration
- Device Testing
- Battery Charging
- Device Kitting
- Cellular Provisioning
- Product Deployment

LIFECYCLE SERVICES:

- Mobile Device Management
- Spare Pool Management
- Emergency Device Replacement
- Hardware Helpdesk
- Maintenance and Cellular Contract Management
- Hardware Lifecycle Refresh

Leave it to **BARCOM** to install, support and maintain your fleet of devices. We have the resources and expertise you need to keep track of each unit, remotely deliver needed updates and provide authorized maintenance and repair services. Keep driver productivity high and total cost of ownership (TCO) low with a worry-free plan that keeps your equipment in good working order.

"BARCOM takes the time to work with us in order to recommend the best solutions for our business."

- D. Hayes,
Xpress Global Systems

"BARCOM helped us determine technologies needed, and in two weeks they had us up and running. They have become a key member of our Logistics team."

- B. Trantham,
Tranco Logistics LLC

"BARCOM routinely provides a market overview that includes new trends and technology to keep us current. BARCOM is a true partner."

- K. Montgomery, Kenco
Management Services

Mobile Devices for Fleet Management

The field is no place for an ordinary commercial device. Your drivers need reliable equipment designed to withstand the abuse of a rough and tumble environment. At **BARCOM** we recommend only the most durable and reliable hardware in the industry such as Honeywell, Zebra and Panasonic. Features and benefits include:

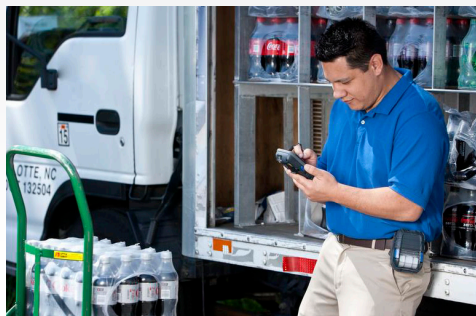

- Rugged Exterior Housing
- Field-Replaceable Batteries
- Extended-Life Batteries for Full-Shift Operation (Optional)
- Resistance to Cold, Heat and Moisture
- Ability to Withstand Multiple Drops to Concrete
- Light-weight and Easy to Use
- Significantly Longer Lifecycles than Commercial Devices

Choosing a mobile computing device designed for a busy workforce in a harsh environment will not only save you money over the lifecycle of the device, but will also give drivers reliable uptime in order to perform their critical customer-facing tasks.

Process improvement isn't just about how processes become more efficient.

It's about understanding how automation can minimize data entry errors, reduce human effort, decrease the time it takes to carry out a task and maximize productivity. With the right technology from industry-leaders and integration expertise from **BARCOM**, speeding up repetitive processes can significantly impact positive operational efficiency & costs.

- Achieve Accurate, First-Time Deliveries
- Upgrade from Fixed to Dynamic Routes
- Save Fuel and Idling Costs
- Offer Guaranteed, Fixed-Time Delivery Slots
- Attain Near 100% Accuracy
- Extend Delivery Window Transparency to Customers
- Maximize Customer Satisfaction and Loyalty

Tangible results, such as streamlined operations, increased profits and the ability to provide your customers with outstanding service will keep your business growing. With an average cost savings range of \$5,000-\$10,000 per truck per year, you can't afford not to automate!

BARCOM, Inc. specializes in data collection automation solutions for fleets, distribution centers and manufacturing.

Since 1991, **BARCOM** has provided solutions that increase worker productivity and control operating costs. From route planning and execution to navigation, telemetry, proof of delivery and compliance, we follow a solutions-oriented approach to improve operational challenges. Our technical expertise and real-world experience begins with design and installation and continues with our ongoing support and service.
